Streamline Your Protein Research with Our Comprehensive Western Blot Workflow Package

Unlock the full potential of your protein research with our expertly curated Western blot workflow package. Designed specifically for active researchers like you, this comprehensive solution combines essential small equipment and high-quality consumables to ensure efficient and accurate results.

Key Benefits:

- **Efficient Workflow:** Simplify your Western blot process with our optimized equipment and consumables, saving you time and resources.
- **High-Quality Results:** Achieve consistent and reliable data with our carefully selected products, ensuring your research stands out.
- **Cost-Effective:** Enjoy the convenience of a bundled package, reducing the hassle of sourcing individual components.

Discover a Smarter Way to Protein Research. Contact us (sales@darwinscience.com) today to learn more about how our Western blot workflow package can enhance your research capabilities.

Complete package of Western Blot Workflow equipment and reagent

- Basic Electrophoresis Power Supply-Power basic 300
- Mini Vertical Electrophoresis Cell-miniPRO4
- Colour Protein Marker II, 10-245 kDa
- 5x SDS-PAGE sample loading buffer
- Bradford reagent
- Mini4 Vertical Blot-TBLOTmini4
- NZY Advanced ECL

5,118 SGD
